Bionic Brain Club

Northwest Parkinson's Foundation

4407 North Division Street, Suite 210, Spokane, WA 99207

Call for appointment

The **Bionic Brain Club** is a group for people living with Parkinson's disease or Essential Tremor who are interested in Deep Brain Stimulation (DBS) Therapy. Connect with your local care team of neurologists, neurosurgeons, and industry specialists to discover how this therapy may make a difference for you. Deep brain stimulation (DBS) is a surgical procedure that uses a device to send electrical pulses to the brain to treat symptoms of movement disorders like Parkinson's, essential tremor, and dystonia.

For more info or to set up an appointment, contact John Cahill
509-828-7193

Join us to learn about:

- What is DBS therapy and is it right for you
- The benefits of DBS
- Patient candidacy
